

AWNING SYSTEM - installation instructions

AWNING SYSTEM - istruzioni di montaggio

The following instructions are applicable to all the deck fittings available in our system.
Le seguenti istruzioni sono valide per l'installazione di tutte le basi presenti sul nostro catalogo.

Instruction for drilled socket.
Istruzioni per bicchiere con fori.

Type IP 4500
Type IP 6600
Type IP 8600

Instruction for threaded socket.
Istruzioni per bicchiere filettato.

Type IP 4501
Type IP 6601
Type IP 8601

TOOLS REQUIRED FOR INSTALLATION

- drill
- hole saw
- wrench
- marine sealant
- threadlocker
- anti-corrosion lubricant
- non-acidic degreaser

ATTREZZATURA NECESSARIA

- trapano
- fresa a tazza
- chiave inglese
- sigillante marino
- frenafiletto
- lubrificante non corrosivo
- sgrassatore a base non acida

Type: IP 4500, IP 6600, IP 8600

Type	Hole saw (\varnothing)	Drill bit (\varnothing)
IP 4500	25 mm	6,5 mm
IP 6600	37 mm	6,5 mm
IP 8600	49 mm	8,5 mm

1) MARK AND CUT THE HOLES

- Use the backing plate as a jig to mark the central hole and the mounting holes
- Use a drill bit and a hole saw to cut the hole

1) TRACCIARE E FORARE

- Usare la contropiastre come dima per tracciare il foro centrale e per i fori di montaggio per le viti
- Usare un trapano con punta e fresa a tazza per effettuare le forature

2) PREPARING

- Carefully clean the bottom side of the deck base, then bed the mounting surface with a marine sealant

2) PREPARAZIONE

- Pulire attentamente la parte inferiore della flangia di base, quindi applicare su tutta la superficie di contatto un sigillante marino

Type: IP 4501, IP 6601, IP 8601

Type	Hole saw (\varnothing)
IP 4501	25 mm
IP 6601	37 mm
IP 8601	49 mm

1a) MARK AND CUT THE HOLES

- Use the backing plate as a jig to mark the central hole and the anti-rotating hole
- Use a hole saw to cut the central hole

1a) TRACCIARE E FORARE

- Usare la contropiastre come dima per tracciare il foro centrale e il foro per l'antirottazione.
- Usare un trapano fresa a tazza per effettuare il foro centrale

2a) PREPARING

- Carefully clean the bottom side of the deck base, then bed the mounting surface with a marine sealant

2a) PREPARAZIONE

- Pulire attentamente la parte inferiore della flangia di base, quindi applicare su tutta la superficie di contatto un sigillante marino

Type: IP 4500, IP 6600, IP 8600

3) INSTALLATION

- Position the deck socket and put the backing plate, bolts (with a small bed of thread locker), washers and nuts
- Tighten the nuts firmly
- Clean up the excess sealant

3) INSTALLAZIONE

- Inserire il bicchiere, le viti (con un po' di frenafiletto), quindi aggiungere le rondelle e i dadi
- Stringere forte i dadi di fissaggio
- Pulire l'eccedenza di sigillante

Type: IP 4501, IP 6601, IP 8601

3a) INSTALLATION

- Position the deck socket with the antirotating pin and place in the order: the backing plate, the washer, the nuts (with a small bed of thread locker)
- Tighten the nut firmly
- Clean up the excess sealant

3a) INSTALLAZIONE

- Inserire il bicchiere, con il pin di antirottazione, quindi in sequenza: la contropiastra, la rondella, il dado (con un po' di frenofiletti)
- Stringere forte il dado di fissaggio
- Pulire l'eccedenza di sigillante

AWNING SYSTEM - maintenance guide

AWNING SYSTEM - manutenzione

This is a reliable and low-maintenance system. A regular cleaning will ensure a long service life to your awning system.

Il nostro sistema ombreggiante è affidabile e richiede una minima manutenzione. Una pulizia regolare ne garantirà una lunga durata.

Simple cleaning operations to do whenever you like. At least once a month

- Clean with fresh water
- When using soap, use mild soap and rinse thoroughly with fresh water

Regular maintenance operations to do every 5-6 months

- Clean with warm water and a cloth
- Use mild detergent to remove light marks, rinse thoroughly and towel dry
- Use a stainless steel cleaner and a polishing compound if you need to restore the surface from staining or scratches.
- DO NOT use abrasive cleaning products
- DO NOT use steel or brass wool,

Semplici operazioni di pulizia da fare in ogni occasione. Almeno una volta al mese

- Lavare con acqua dolce
- Se si usa un detergente, impiegare un sapone liquido non aggressivo, quindi risciacquare con acqua dolce

Interventi di manutenzione da fare una volta ogni 5-6 mesi

- Pulire con acqua calda e un panno
- Usare un detergente neutro per rimuovere piccole macchie, risciacquare abbondantemente e asciugare
- Usare un detergente per acciaio e una pasta abrasiva se fosse necessario ripristinare la lucidatura rovinata da macchie persistenti o graffi
- NON usare prodotti detergenti abrasivi
- NON usare spazzole in acciaio o ottone
