# WHY CHOOSE SEASTAR HYDRAULIC HELMS?

Unmatched comfort and control only with SeaStar Steering. The world's most popular hydraulic steering system – offering smooth, efficient No Feedback Steering for single and multi-outboard engines up to 350Hp (700HP combined for counter rotating twins) for speeds up to 60 MPH.

## Features

- Greatly reduced “chatter” noise that is typically generated by overrunning steering loads
- Improved check valve durability with a more robust design (resulting in better trailering performance as well as longer service life)
- Eliminated flow noise when coming off hard-over position
- Decreased clicking sound of the lock valve spool during steering reversal
- Tighter, more responsive steering resulting in better “regrip” performance (also known as precession)
- Full compatibility with existing SeaStar hydraulic steering systems
